Examples of Domestic Application

Feedback from customers

“Improved Cleaning Results Through Ecovortek Water

Things seem to get cleaner, really cleaner when they are washed by hand. Washing water soaps up more by about an 80% improvement. The suds stay in the dishwasher when they previously used to disappear very quickly.

Dish washing gets things cleaner, shinier and brighter. No more water marks or streaks are found on glasses or on stainless steel which is also shinier.

Whilst washing cloths the water gets dirtier very quickly and the clothes are cleaner more quickly.

Great product.”

Improved Health & Wellbeing Through Ecovortek Water

“Over 2 years ago I had been diagnosed with cancer. I was concerned about the water I drank. I knew that the water contained chlorine and also fluoride which is a poison and carcinogenic if taken in too great a quantity. So, when Andrew brought over the Ecovortek container I gladly accepted to try it out. He gave me some tap water to drink then he poured me some water that had been through the Ecovortek container. I could not mistake the difference in the quality of the water. It felt smooth, no harshness to it, if you can describe the water in that way.

The people who come to my home and drink the water from the Ecovortek unit have never again helped themselves to the tap water. I feel I am doing something positive for my body by drinking the water that is processed by the Ecovortek. I wouldn't be without it.

As we all know cancer is somehow related to oxidation so knowing that the water carries anti-oxidents it gives me even more re-assurance that I am drinking something that is working towards prevention of cancer.

I have felt physically well drinking the water and it also gives me peace of mind and for me that make a huge difference to my life.”

Denise W.

Ecovortek Unit Improves The Taste Of Water

“I'm really happy with the ECOVORTEK water well and I'm sure my food tastes better being cooked in the water. My visitors won't touch the tap water for their herbal tea or when they just want water at my place.”

Chris S.

Ecovortek Unit Improves Water Quality For Commercial Fish Breeding

“The water has cleared right up to the point of visibility across the tank, side to side. Since the drum filter and your ECOVORTEK unit have been fitted the fish have shown a definite improvement resulting in a decreased mortality.”

Ecovortek Water Relieves Cancer Patient

John G.
Newton SA 5074
20th December 2000

Mr Andrew Shore
Director
Ecovortek Pty Ltd
PO Box 6142, Halifax Street
ADELAIDE SA 5000

Dear Andrew,

Recently I became aware that I had prostate cancer and after all the preliminary tests, began a treatment with radiotherapy. However, the radiotherapy did not agree with me giving me severe bowel problems and partway through the course, it was terminated.

I really had no option for any other treatment and was resigned to live with the problem and make the most of each day as it came.

I was aware of the fact that the passing of water would become increasingly more frequent and may even become restricted by the swelling of the prostate cancer.

I was sharing these thoughts with a friend who said, "Would you like to see what can be done with Naturopathy?" Through this contact I acquired one of your ECOVORTEK urns complete with its special filter to provide drinking water.

Within ten days there was a marked change. Where I had been passing water every 3 hours, with some incontinence, I had changed to being able to stay for as long as 6 to 8 hours before needing to pass water and no incontinence.

Also, I can now sleep right through over night without needing to get up and go to the toilet.

I attribute these changes entirely to the mystery filter in the drinking water urn provided by you, and I wonder if there may be even more benefits to be discovered.

Thanking you for your assistance in this matter.

Yours faithfully
John G
